Solution Approach to the Problem	Marks Category
he solution does not address the requirements for the given Industry/Society problem.	1+0.15
The solution only solves a generic technical / IT problem	1 to 1.5
The solution partly addresses the given Industry/ Societys problem.	2+02
The chosen approach is basic with many known available solutions.	2 to 3 3.5 to 4
The solution provides a unique approach to the Industry/ Society's problem, but it may	
not be extendable into a platform for larger impact. The team has focused entirely on	
solving the specified problem in hand.	
The solution completely drives new business model/socital engagement using	4.5 to 5
software/technology driven methodology for the specific domain (e.g. what	
Uber/Paytm did in their domain).	
The solution has the capability to extend into a platform for larger Impact. The team has thought through the problem to the end and considered all aspects	
pertaining to the solution.	
pertaining to the solution.	Marks
Ambitiousness/Complexity/Impact Factor	Category
simple problem statement requiring very little technical input (e.g. building an App with	
very little server side components OR building a simple Web page/Website).	1 to 1.5
Medium Ambitious problem, requires a reasonable effort on both client side and server	
side. For the market, the problem is real and they welcome the solution, but it is not an	2 to 3
immediate/Top priority to address.	
Fairly Complex problem – requires significant effort on client and server sides. Team	
has demonstrated their Ambitiousness by selecting to work on the problem. The team	
has implemented a small subset of the problem and hence its impact to the Industry/	3.5 to 4
Society is minimal. Significant additional effort is needed to implement the solution for	
the Industry/ Society.	
Fairly Complex problem and team has implemented a significant subset of the problem.	4.5 to 5
Problem is very important to the Ministry and the Ministry can Implement the Solution	
with minimal additional efforts.	
Technology and Innovations Attributes	
	Category
Not an innovative solution, it is regular web portal or desktop app.	1 to 1.5
Solution is innovative and uses concepts like mobile first/cloud first and API level	2 to 3
integrations.	100000000000
Solution has been innovatively designed using latest technologies e.g. India-stack, block- chain, machine learning, data insights, human machine interface etc.	3.5 to 4
chan, machine realing, data insigns, numur machine interface etc.	
Solution is well thought out and is something extremely unique. It has very innovative	4.5 to 5
approach - effective use of multiple latest technologies (e.g. listed above).	
Execution Attributes	Marks
Execution Attributes	Category
No working demo	1 to 1.5
Few screens but not integrated	
Partial working demo to be able to showcase solution to the problem.	2 to 3
ntegration of code/development was there but not end to end. Demoed multiple parts	
separately.	
Usable and working demo however it was small and felt some development missing.	3.5 to 4
Some of NFRs (Security, Performance) are also considered while implementation	200000000000000000000000000000000000000
Completely working prototype of demo which can be repetitively executed (significant	4.5 to 5
amount of coding or development might have gone in place). Most of NFRs (Security, Performance) considered while implementation	
Most of NPRS (Security, Performance) considered while implementation	
User Experience Attributes	Category
Not Useful – Personas(*), journey map not defined	
Not Usable - Confusing navigation, too many clicks, poor execution of UI	aparanan en
Not Desirable - Negative first impression, will not motivate personas / users	1 to 1.5
* Personas - Personas are fictional characters created to represent the different user	
types that might use a site, brand, or product in a similar way.	
Partly Useful - Personas identified but not clearly detailed out	2 to 3
Partly Usable - Confusing navigation, too many clicks, average execution of UI	
Partly Desirable - Average first impression, just another app for personas / users	3.5 to 4
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps	
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps Usable - Easy to navigate, simple layouts, followed UI patterns, efficient for users	3.5 to 4
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps	3.5 to 4
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps Usable - Easy to navigate, simple layouts, followed UI patterns, efficient for users Desirable - Positive first impression, will motivate personas / users Extremely Useful - Well Detailed Personas (one or many), detailed journey maps	3.5 to 4
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps Usable - Easy to navigate, simple layouts, followed UI patterns, efficient for users Desirable - Positive first impression, will motivate personas / users Extremely Useful - Well Detailed Personas (one or many), detailed journey maps Extremely Usable - Super easy to navigation, followed UI patterns, efficient for users	3.5 to 4
Partly Desirable - Average first impression, just another app for personas / users Useful - Detailed Personas (one or many), detailed journey maps Usable - Easy to navigate, simple layouts, followed UI patterns, efficient for users Desirable - Positive first impression, will motivate personas / users Extremely Useful - Well Detailed Personas (one or many), detailed journey maps	507507700
